Subject: microsoft settlement

Dear Mr. Ashcroft:

This letter is in reference to the justice department's settlement with Microsoft regarding the antitrust issues raised by the morally and economically bankrupt liberal demarcates under the leadership by Joe Klien, who served an impeached president.

The same justice department which refused to investigate Bill Clinton's shenanigans and Albert gore fund raising practices using the Buddhist temple and other more despicable acts, went after a successful corporation under a socialist populist guide. Egging on are the attorney generals of different states, who need a forum to run for the governor of their respective states. Those who extorted money form Tobacco industry under the guise of covering Medicaid and Medicare costs went in search of other lucrative extortion targets and found Microsoft, which became as damaging to consumers in their eyes as Asbestos, lead paint, tobacco and other extortable industries. In that way, salt, sugar, orange juice, carrots and any product existing on earth is potentially a target for the corrupt liberal democrats.

I fail to understand that while fighting against Taliban and El Khaida, we still have to wage a legal war against our own hardworking innovative corporation like Microsoft, who have brought computers with in the reach of an average American like me.

While the litigation was going on I heard statements to the fact that Microsoft was not a player in Washington, with influence campaign contribution and its own lobbyist, pr personnel and other assorted hangers on and social parasites. Thus our government and the political system has now become as a Mafia like extortionist, where every successful corporation like Microsoft has to pay a tribute and bribe to politicians to conduct its business.

Under the settlement Microsoft has to divulge its source code and for the corrupt liberal demarcates even that is not enough. Why should it not protect its intellectual property which it has spent billions to develop Those unsuccessful companies like Novell who have not been successful in the market place, should pull political strings to hobble a successful corporation? In stead of encouraging them, they should be exposed, condemned and denounced.

Why a law suit which was started under a draft dodger, pot smoker, financial swindler, morally bankrupt, anti business Clinton should be carried on by us republicans beats me.

But some of these corporations are aptly known as rope sellers, Lenin say that capitalists will sell us the rope with which we will string their neck with. Thus any corporation or any aerate hard working American who gives a penny to the liberal democrats is digging its own financial and personal grave.

By giving political contribution to the domestic El Khaida and Talibansit like John Dingell, Henry Waxaman, Tom Daschel, Ed Markey and other fascists Microsoft created a problem which it is trying to solve through painful compromises with DOJ.

Let us solve their problem once for all by agreeing and quickly implementing the settlement and stopping the extortion once for all.
